

# CD/DVD kopieren

The image shows a sequence of three overlapping screenshots from a Mac OS X DVD burning application, illustrating the steps to create a DVD image.

**Step 1:** The top screenshot shows the application window titled "Mac OS X Upgrade DVD". The "Neues Image" button in the top toolbar is circled in orange and labeled with a "1". The left sidebar shows a list of volumes, with "Mac OS X Upgrade DVD" selected. The main area contains instructions for deleting a CD/DVD.

**Step 2:** The middle screenshot shows a dialog box titled "Sichern unter:" (Save as:). The "Sichern unter:" field contains "Mac OS X Upgrade DVD" and the "Ort:" (Location) field contains "Diskimages". The "Image-Format:" (Image format) dropdown is set to "Nur lesen" (Read-only) and is circled in orange with a "2". The "Verschlüsselung:" (Encryption) dropdown is set to "Ohne" (None). Buttons for "Abbrechen" (Cancel) and "Sichern" (Save) are visible.

**Step 3:** The bottom screenshot shows the application window with the "Brennen" (Burn) button in the top toolbar circled in orange and labeled with a "3". The left sidebar shows the same list of volumes, with "Mac OS X Upgrade DVD" selected. The main area contains instructions for repairing a volume.

At the bottom of the application window, the following information is displayed:

- Mount-Point: /Volumes/Mac OS X Upgrade DVD
- Format: Mac OS Extended
- Schreibstatus: Nur lesen
- Anzahl der Ordner: 7.815
- Kapazität: 7,1 GB (7.634.915.328 Byte)
- Verfügbar: 3,5 MB (3.620.864 Byte)
- Belegt: 7,1 GB (7.631.294.464 Byte)
- Anzahl der Dateien: 16.724
